

Pre Grout Porcelain Tile Protector

PORCELAIN

Protects surfaces against staining from cement, grout, jointing material and organic matter
/ Exterior & Interior Use

DESCRIPTION

Water based pre-grout treatment. Protects surfaces against staining from cement, grout, jointing material and organic matter. For use on all types of textured porcelain tile surfaces. Helps with grout and jointing compound release. A further coat can be applied after grouting, which helps with the future removal of stains from organic matter.

DIRECTIONS

Preparation

Ensure surface to be treated is completely clean, dry and free from dirt, grime, cement and grout. If necessary, first wash surfaces with a dilute solution of ROCATEX Tile & Stone Renovator 1:5 and scrub with a white nylon pad. Rinse well to remove residues and leave to dry.

Application

Shake bottle before use. Before grouting apply evenly to the surface using a broad paint brush, foam roller or light pressure sprayer. Allow to dry for 30 minutes. Apply a second coat. Leave to cure for a minimum of 1 hour before grouting or pointing. Once pointing is dry and residues have been removed a further coat of protector can be applied covering the joints as well.

COVERAGE: M² PER COAT

	1 LTR	5 LTR
Lower porosity surfaces	30m ²	150m ²

AFTERCARE

Routinely sweep and wash surfaces. Clean and mop surfaces with ROCATEX Tile & Stone Cleaner.

STORAGE INFORMATION

Store in a cool, dry, frost-free environment. Store locked up. Shelf Life – Up to 2 years for un-opened containers.

OTHER

Hard to remove dried on cement stains can be removed using ROCATEX Cement, Grout & Salt Residue Remover. Hard to remove stains from jointing compounds can be removed using ROCATEX Resin Residue Remover. Empty containers are recyclable. Active ingredients are water soluble and inert once cured. Do not use in temperatures under 5°C or over 25°C. Clean application tools and brushes with water after use.
